fig: TPIN (only for offline)

Commented [MS1]: Spelling of dropdown

Classification: Internal

Process:

Merchant wants to Apply for POS

Sr No.	Parameter	Original FSD	Addendum	Clarification/ Addendum	Justification
1	Eligibility Criteria	Account types (CC, OS, CA) and constitution codes to be checked	Account type and constitution codes not to be checked. If user can login to the MSME App they are eligible for this journey	Clarification	Already checked at Login of the app. To avoid duplicity
2	Settlement Account Details (Fetched from CBS)	Order was not mentioned	Order in dropdown: CCA, ODA, CAA. (Typically, there is only one CC or OD account.) In the case of multiple accounts of same type, display them by default in the order of account opening date with oldest first. Already registered accounts in dropdown will be greyed out.	Clarification	Considering CC and ODA accounts are the primary operative accounts
3	GSTIN Details	GSTIN was editable by user and included field for sub nature of Business. The GSTIN of the user to be pre-fetched from CBS. 'Nature of Business' will be pre-populated from GST API (if available). If it is not available via the API, it will be fetched from CBS.	- It should be non-editable by the user and only fetched automatically. It is mandatory for turnovers exceeding 20L. If the user selects "More than 20L" from the Annual Turnover dropdown and GSTIN is not fetched, prompt the user to complete KYC at the branch or update the profile on the app, and end the journey. - First fetch GSTIN from CBS if not available then from Karza. - If GSTIN is fetched from Karza then show the user, following message with a pop-up – "This GSTIN is only applicable for this application. If you want to permanently update the GSTIN, please complete KYC at the branch or update your profile on the app." - Nature of business to be first fetched from CBS, if not available then from Karza.	Addendum	To avoid inconvenience and error while entering
4		Blue box details: Not Present	Blue box details: Business Name, Business Pan and Business Address	Addendum	

Classification: Internal

	Business details page:	the fields were GSTIN, Nature of Business, Sub-Nature of Business, Expected Annual Turnover, Expected Annual Sales via Cards, Frequency of Collection, No. of transactions, Average value per transaction, Minimum ticket size, Maximum ticket size	Updated fields: the fields are as per the screen attached above. Mobile Number (fetched from CBS and non-editable). Email Address (Mandatory, fetched from CBS but editable, requiring OTP verification if edited, with up to three attempts allowed before locking access for 30 minutes). Alternate Mobile Number (requiring OTP verification for validation, with the same rules as the Email field). Delivery details: Moved to business details	Addendum	After Demo and Market Visit observations
5	Other Details:		Renamed to Upload Pictures, and moved Mobile, Email and Alternate mobile to business details	Addendum	Demo Observation
6	Set up Standing Instructions	CTA was "Set up Standing Instructions"	There will not be a screen to setup Standing Instructions. The vendor will share the list of devices and their installation dates with DBP. These Details to be sent to CCMAAB via Email and via MIS report (Template to be given by bank). (MIS report capability to be confirmed)	Addendum	After API discovery
7	Stamp Duty page.		- User to select either to proceed online (conditional) or to proceed offline. - If user selects proceed online a bottom sheet will open with stamp duty charges and a checkbox that states – "I will allow Union Bank to debit my account for stamp duty charges". Users have to click continue to proceed to review page. - If user select proceed offline, then a bottom sheet to open that gives branch details related to that customer's account and timing. (Timings can be fixed - 10.00 a.m - 4.00 p.m (Monday to Friday, Monday to Friday, 1st, 3rd and 5th Saturday)). User to click continue to proceed to the review page.		
7	Review Page Details:		The fields in review details screen will follow the same sequence as the figure mentioned above. If user has selected to proceed offline for stamp duty process, then user have to click 'submit' then enter his TPIN to submit the form,	Addendum	Demo Observation

Commented [PMP4]: ALREADY AVAILABLE IN ORIGINAL FSD PAGE NO 10

Commented [PMP2]: What is this. Whether these were captured earlier as per existing FSD??

Commented [JN3R2]: Mobile number was editable - now non-editable.
And were in the other details section, now moved to merchant details.
Locking logic of OTP not mentioned in FSD

Commented [PMP5]: Already available in original FSD page no 10

Classification: Internal

			application will be forwarded to Assisted portal for Agreement Execution. If user has selected to proceed online for stamp duty, then after clicking 'submit & continue' they will be redirected to NESL Portal. If agreement execution fails at NESL portal they will be redirected to review page with a pop-up where user can choose to either try again to redo the Agreement Execution process or cancel to get back to review page.		
8	Success Screen	Application reference Id format not given	The application reference ID generated in DBP will follow this format: POSDDMMYY-6-digit serial number (the 6-digit serial number will increment starting from 000001 and each day will reset to 000001 after midnight at 12:00 a.m. For example: POS240924000001, POS240924000002, and POS240924000003	Clarification	To keep a common logic for the app
9	Agreement Execution process	NESL to show online DDE option only to states where it is applicable	Eligibility Criteria for NESL: DOB (for Individuals) or DOI (date of incorporation) (for Non-Individuals/Sole Proprietors) should be fetched from CBS. Proceed online option to be given if DOB/DOI is fetched and online facility is available in the state; otherwise, use only the offline process. - The amount for the NESL online process will be provided by the bank for each state in the form of a table. This table should be made configurable. - As the bank will pay the NESL charges on behalf of the customer, the customer's account will be automatically debited and the amount credited to the bank's NESL pool account after the customer completes the journey.	Addendum	After API discovery

7. Conditions for MCC validation on Assisted portal:

Classification: Internal

Sr No	Scenarios	Original FSD	Addendum	Clarification/ Addendum	Justification
1	TAT for MCC validation	TAT for branch to close the lead will be in 2 days, Escalation Matrix to be maintained	TAT is <72> hours after which escalation mail will go to RO (regional office) which the branch is mapped to.	Clarification	After discussion with assisted portal team
2	To Access applications from Assisted portal	The branch employee to navigate to the POS application ID by searching through user mobile number/application id.	MCC validation to be carried out by branch users from their dashboards on the assisted portal.	Clarification	
		MCC Validation Required or Not at Assisted Portal			
3	If Nature of Business is fetched from karza or CBS	Mandatory	No	Addendum	Demo Observation
4	If Nature of Business is not fetched, and User selects one from the dropdown	Mandatory	Yes	Clarification	
5	If Nature of Business is Fetched but later changed by user	Mandatory	Yes	Clarification	

2. Merchant wants to view POS transactions

Commented [PMP6]: Not required as live transaction is available on the dashboard

Sr No.	Parameter	Original FSD	Addendum	Clarification/ Addendum	Justification
1	View Transactions	The system to display 2 Transaction type action tabs - Collections & Settlement.	There will not be these 2 action tabs in this journey - Collections & Settlement. As they are already available in dashboard	Clarification	To keep a common logic for the app
2		There will be a CTA to 'Trigger MIS report' to the email ID of the customer [The details available in the MIS report and the MIS report capability will be dependent on the API capability]	There will not be a 'Trigger MIS Report' functionality. This is the transaction statement report, and as the merchant will receive it directly, there is no need to generate an MIS report.	Clarification	Demo Observation

Commented [MS7]: ? explain this

Classification: Internal

Sr No.	Details	Clarification/Addendum
1	Transaction details for POS is to be fetched from Vendor.	Clarification
2	Pending Settlement information will be provided by Vendor (Mswipe).	Clarification
4	Pending Transactions information will come from Vendor (Mswipe). [All transaction with status pending (Not yet settled at bank)]	Clarification
6	Transaction details will be continuously fetched.	Clarification

Merchant wants to raise a dispute for POS transactions (Addendum)

For Individual transactions:

1. A 'Raise a Dispute' CTA is available on the transaction details screen.
2. When the user clicks on 'Raise a Dispute', a new screen opens featuring:
 - a. A dropdown for selecting the 'Reason for Dispute' (dropdown values to be provided by the bank).
 - b. Optional remarks input field.
3. The user clicks "Continue" to proceed. A ticket details screen is displayed with the ticket number and status once the dispute ticket is successfully raised.
4. A mail to be sent to CCMAB and a ticket will be raised in CRM.
5. The CTA on the transaction details screen changes from 'Raise a Dispute' to 'View Dispute Ticket', where the user can view the ticket details and its status.

For individual transaction (screens):

For Multiple transactions:

1. On the view transactions screen, the user navigates to the 'Raise a Dispute' section.
2. In the 'Raise a Dispute' section, the user can filter transactions and select one or more transactions to raise a dispute by checking the respective checkboxes or select all.
3. There will be only Pending and settled transactions, so will the selection chips.
4. After selecting the transactions, the user clicks "Continue".
5. A new screen opens, presenting options for:
 - a. The Reason for Dispute in a dropdown menu (values to be provided by the bank).
 - b. Optional remarks input field for adding dispute-related comments.
6. The user clicks "Continue" to proceed. A ticket details screen is displayed with the ticket number, status, and associated transaction details once the dispute ticket is successfully raised.
7. A mail to be sent to CCMAB and a ticket will be raised in CRM.

Classification: Internal

8. The user can click on 'Go to Transactions', which redirects them back to the View transactions page.

For Multiple Transactions (Screens):

Figure: Transactions Screen

Viewing Previous Tickets:

1. In the "Raise a Dispute" tab, the "View Previous Tickets" section is displayed, allowing the user to view details of all past disputes.
2. Upon clicking "View Previous Tickets", a list of previously raised dispute tickets is displayed along with the date they were raised.
3. The user can select a specific ticket to view more details.
4. Resolved tickets will have a status of 'Request Resolved' along with a 'Closure Comment'.
5. Resolved tickets will remain in the list for 30 days after their date of resolution.
6. The status of tickets raised will come from CRM.

Classification: Internal

Classification: Internal

Process:

Merchant wants to raise service request for POS (subject to capability of vendor)

1. If a user wants to raise a service request for a specific device, they can navigate to the "Your Device" page from the list of devices available in the account selection.
2. The "Your Device" screen will display two CTAs: "Raise Request" and "View Transactions."
3. After selecting "Raise Request," the page will move to the "Requests" section.
4. For raising a service request there will be another entry point from help & support section of the App.
5. The user can either submit a maintenance request or a surrender request (the fields will be as per the screen given above). The list of reasons for maintenance and surrender will be provided by the bank.
6. The user must click "Submit" and enter their correct TPIN to submit the service request, after which it will be forwarded to the vendor.
7. A "Request Raised" screen will display the fields as per the screen given above.
8. Reference ID: The format will be the same as the application ID but with the prefix POSSR_____.
9. When a user submits a surrender POS request, the request will be sent to the vendor. Once the vendor confirms the surrender of the POS, an email will be sent to the CCMAB team with the details.
10. When the vendor confirms the surrender of the POS, the status of the POS device will change from active to inactive.
11. Inactive devices will be visible for 30 more days from the date of their surrender. During these 30 days, the user can view the transactions and the request history.

View Request History:

1. The user can navigate to the "Request History" section from the "Your Devices" screen.
2. This section will display a list of tickets raised for that device, sorted by the date of submission. The user can select any ticket to view its details.
3. The ticket details will include all the details shown in the screens above.
4. The user can click on "Your Devices" to be redirected to the list of devices page.
5. Resolved tickets will remain visible for 30 days from the date of their resolution.

4. Assisted Portal Dashboard for Branch user: (Not in original FSD) (Clarification)

Overview:

Classification: Internal

Commented [PMP8]: Please check with assisted portal, as these dashboards are already taken up as capability of Assisted portal

Dashboard provides an overview of all collection applications processed by the bank, which can also be searched by application number and customer mobile number. There will be a “New Application” CTA to start new applications and an application details section in a tabular format with the following columns:

- Application No.: A clickable link with copy button to the detailed application view.
- Customer Details: Displays the customer's name, contact number, and CIF.
- Application Date with a Countdown: The date the application was submitted. Application process to be completed within 72 hours as mentioned above.
- Product: The type of product applied for (e.g., Bharat QR, POS Device, Payment Link).
- Source: Indicates the channel through which the application was submitted.

Stages for POS:

- Case 1. User applies through Mobile banking: 1. MCC validation (conditional), 2. Agreement Execution
- Case 2. User applies through Assisted portal for POS: 1. Select Product, 2. Delivery Details, 3. Business Details, 4. Upload Pictures, 5. Review, 6. Agreement Execution

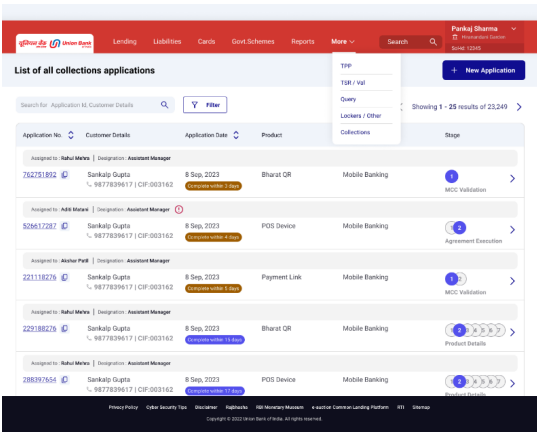

Figure: Screen for Assisted Portal Dashboard

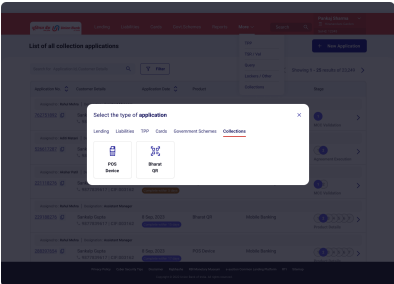

Figure: New Application from Assisted Portal Dashboard

Classification: Internal

5. Additional points: (Not mentioned in Original FSD) (Clarification)

1. Journey should be built to accommodate multiple vendors.
2. All Dropdowns and filter menu should be made configurable – via admin portal

Commented [PMP9]: Already available

6. Maker Checker points: (Modified Points) (Addendum)

Commented [PMP10]: Already available

Apply for POS

Initiator Flow

Initiator will have to select either to proceed online or offline

Approver flow:

1. If Initiator has selected proceed offline: Then Approver has to approve the form and enter their TPIN. Then the application will be forwarded to Assisted portal.
2. If Initiator has selected proceed online. Then Approver has to click 'approve and continue'. Then they will be redirected to NESL portal for agreement execution. If agreement execution fails at NESL portal they will be redirected to review page with a pop-up where user can choose to either try again to redo the Agreement Execution process or cancel to get back to review page.
